

## Self-Skinning Flexible Foams

### *HSF 1305*

Pentane blown, self-skinning, flexible foam.  
Soft version. Available in 5.0 to 15.0 p.c.f.

### *HSF 1301*

Pentane blown, self skinning, flexible foam.  
Exhibits excellent physical properties and thick integral skin.  
Medium feel. Available in 5.0 to 15.0 p.c.f.

### *HSF 1303*

High modulus, semi rigid version of HSF 1301.  
Available in 5.0 to 15.0 p.c.f.

## Flexible Packaging Foams

### *HSF 3000-0.5*

Two component, all water blown, packaging foam. Low viscosity allows standard processing through standard 50/50 by volume ratio equipment. Available in 0.4 to 1.0 p.c.f.

### *HSF 3000-0.5 FR*

Fire retardant, low density, semi-flexible packaging system.  
Designed for void filling and insulating of spas and hot tubs.  
Meets U.L. 94 HBF.

### *HSF 3000-0.5 LP*

Two component, all water blown, packaging foam.  
Low pressure version of HSF 3000-0.5.  
Works well for simple packaging equipment.
